## MARATHON RACER

Patent Applied For  
PROPELLED BY SWINGING MOVEMENT OF  
THE BODY LIKE GLIDING ON SKATES

If you were ever a boy  
or girl you know what  
this means. Stand up and  
coast down hill or ride  
on level surface with one  
foot doing the propelling  
--that's the way most  
youngsters use express  
wagons, the Marathon  
Racer is the development  
of that idea. The Mara-  
thon Racer takes the place  
of roller skates and is  
safer. The youngster learns to propel it by swinging  
the body just like gliding on skates. There is nothing  
cheap about the Marathon Racer. Every part, every  
joint is made as good as it can be. Strong, clear select-  
ed oak forms the platform, reach and handle; mission  
finish, kiln dried rock maple wheels, with tubular steel  
bearings. Easier running and less liable to injury than  
ball bearing rubber tired vehicles. Malleable iron cast-  
ings, black japanned, thoroughly tested, indestructible.  
Brake attachment. Here is an invention that appeals to  
every child and not only affords hours of enjoyment but  
is a great benefit to their health. It gives exercise to  
every part of the body. Just look at them at
